Skillfully blending historical data with microeconomic theory, Glenn Parker argues that the incentives for congressional service have declined over the years, and that with that decline has come a change in the kind of person who seeks to enter Congress. The decline in the attractiveness of Congress is a consequence of congressional careerists and of the growth in the rent-seeking society, a term which describes the efforts of special interests to obtain preferential treatment by using the machinery of government-legislation and regulations. Parker provides a fresh and controversial perspective to the debate surrounding the relative merits of career or amateur politicians. He argues that driving career politicians from office can have pernicious effects on the political system: it places the running of Congress in the hands of amateur politicians, who stand to lose little if they are found engaging in illegal or quasi-legal practices.
