I again followed the polar spot from 9 12 to 10 1 28 the same day, and the little satellite spots motion of rotation around the pole was very sensible, as my drawings show. At moments the black thread took the aspect of a black point isolated in the midst of polar snows. At 9h 43m the center of the satellite polar spot reached the central meridian; we find in this manner an approximate longitude of 204. 3 for its center. At 10h 28TM its eastern extremity (seen from the earth) was near the central meridian which gives it the longitude of 215. 3. to Be Continued.
